PREFACE

I am pleased to present the first edition of the “Directory of the ‘Circle of Support’ for People with Disability in Orissa”. This Directory is one of our attempts to identify the existing circle of support networks for people with disability in Orissa. In this directory, we have made effort to record all the NGOs, CBOs, Funding Agencies, Government Departments, Schools, Vocational Training Centres and professionals who are directly or indirectly involved in activities towards development and welfare of disability in Orissa. Unlike the existing directories, we have categorized the information with specific target audience in our mind.

The directory is expected to help, especially People with Disability (PWD), Professionals working for PWDs, Parents of PWDs, NGOs, CBOs, Funding Agencies, and Government. Parent of a Disabled Child can get information about special schools and inclusive education schools available for education of their child. A PWD person with interest in game and sports can contact the game and sports associations given in the directory. An NGO / CBO interested to have professional service for its disability action can find out professionals from the list given in this directory. A service provider can get information to develop his/her skill from the training centres. A PWD can choose a vocational training centre on the basis of his/her interest and need. People interested to have aids and appliance can get information about the manufacturer from this directory. Similarly, the list of medical service providers for the PWDs is also very helpful for both PWDs and Professionals.

This directory is first of its kind in Orissa. Though several directories are available on NGOs in the state, a specialized Directory on disability was not available earlier. In addition, hardly any of the directories gives such systematized information for specific needs and people. The compilation of this directory would have been beyond our reach, without the support from the European Commission and guidance of the Eve Marie, Dortmund University and Phillip Potter, Klaus Novy Institute, Germany and Dr. K. C. Panda, Former Principal, Regional Institute of Education.

I would like to thank Mr. Ajay Kumar Samal, a well-known rehabilitation professional in disability and Dharendra Mahanty, Dr. Bharati Mishra, Sanjay Sahoo, Pradeep Ku. Bhupati Deo, and Aditya Swain of NYSASDRI for compiling such vast and useful information. I hope their effort would be useful in making your work easier.

I would also like to remind you that no directory is complete at its first attempt. We have tried to gather as much information as possible with authenticity. However, we might have made some mistakes in compiling the contact information, work etc. We might have missed some of the organizations / institutions / professionals who are working for PWDs. I request to bring such lapses in the directory to our notice. Suggestions for improvement are always welcome. We would take care of these things in our future editions.

Sarangadhar Samal,
Director, NYSASDRI

Organisations Working on Disability

Disability has come into focus in the field of rehabilitation in recent years. The issue of disability is being highlighted by organisations, policy makers and individuals at different level. Voluntary organisations have contributed significantly for service and rehabilitation of People with Disability (PWDs). The concept of Community Based Rehabilitation (CBR) was also initiated by NGOs. Several NGOs are working for helping the disabled with innovative programmes. Some NGOs are also involved in providing direct support services to disabled of different categories in Orissa.

An attempt has been made here to enlist all Voluntary Organisations / NGOs working for the cause of disability, district-wise. Government organisations dealing with disability are also enlisted. This information would be helpful for service providers, researchers, professionals, NGOs and the Disabled for any support and/or service.

Section-III

Special Schools for Children with Disability

In our society, people with disability are highly neglected by their parents. They are treated with unnecessary sympathy, which makes them mentally weak. However, these people can be educated like other normal people. They can lead their own life with dignity and self-esteem. Like normal children, education is their rights.

Moreover, history shows that disability was never a barrier for achievement. Great achievements were made by many disabled people also corroborates that given training commensurate with their needs and abilities the PWDs can make valuable contribution to the society as any other people. The special schools are a step in this direction.

The following list gives information about the Schools Imparting education to children with Hearing Impaired, Visually Impaired, Mentally Retarded, and Cerebral Palsy etc. The objective is to help the parents in searching a right school for education of their disabled children. The district wise list will simply the search process of parents.

Voluntary Organisations Providing Integrated Education for Children with Disability

(Supported by Ministry of Human Resource Development, Government of India, New Delhi)

It is a customary tendency that children with disability are treated 'differently' and are not educated with the normal children. However, in inclusive education a child with special need is never taken out of the regular classroom. She/he is provided all support services within the regular classroom.

The Ministry of Human Resource Development (MHRD) government of India has been supporting NGOs to implement Integrated Education (IED) Programme for Disabled in schools. The purpose of the programme is to provide educational opportunities for disabled children in common schools, to facilitate their retention in school system, and also to place them in common schools after they acquire the communication and daily living skills at the functional levels in special schools.

The following list gives information about the NGOs who are being supported by The Ministry for implementing IED programme. There is also a list of other NGOs who are implementing IED programmes with support from other agencies.

Institutions Providing Aids and Appliances

With development of new scientific aids and appliances, the problems of CWDs / PWDs can be minimised to a large extent. Several private and government institutions are providing such aids and appliances. As the number of such organisations is very few in Orissa, the list gives names of some national agencies. Name of some organisations in Orissa who are supplying such aids and appliances is also given below. One can contact these organisations for Aids and Appliances on the basis of his/her requirement.

The model of a circle of support (COS) was developed in Canada and spread fairly quickly to North America and the United Kingdom in the 1980s. It was introduced into Germany at the end of the 1990s. A circle of support is a group of people who meet together regularly to help an individual (the 'focus person') accomplish his or her personal goals in life. The circle acts as a community around that person who, for one reason or another, is unable to achieve his or her aspirations independently. The members of the circle of support, who may include family, friends and other community members, are usually not paid for their involvement. They participate because they care enough about the focus person to give their time and energy to helping that person to overcome obstacles and enhance his or her options in life. A circle properly facilitated is empowering to all of the individuals involved (not just the focus person) and, unlike many human service systems, does not reinforce dependence.

This publication is a Compilation of the names and contact details of NGOs, Government Establishments, Private Institutions and Individuals who are involved in support services, especially in education, rehabilitation, clinical service and other services for People and Children with Disabilities in Orissa.

The publication is a part of The “Circle of Support for People with Disability and Autism in India and EU” project implemented by NYSASDRI in partnership with The Dortmund University of Applied Science, Germany. The publication is funded by the European Union within the EU-India Cross Cultural Programmes.
